

42. Total organic carbon
43. Manganese
44. Silicate acid test, Si
45. Fluoride
46. Ammonia
47. Mercury
48. Aluminium
49. Phosphate
50. Lead
51. Nitrate

B. Air Quality Parameter

1. SPM
2. SO₂
3. PM₁₀
4. NO₂
5. PM_{2.5}
6. CO
7. VOC
8. O₃

C. Noise Parameter

Noise Level (dBA)

D. Vibration Parameter

Vibration Level (mm/s)

E. Soil Quality Parameter

1. pH
2. Total Mercury (T-Hg)
3. Total Sulphur (T-S)
4. Total Cyanides (CN)
5. NH₄⁺
6. Chromium (Cr & Cr⁺⁶)
7. Total Nitrogen (T-N)
8. Lead (Pb)
9. Total Phosphorus (T-P)
10. Arsenic (As)
11. Cadmium (Cd)
12. Polychloro biphenyl (PCB)
13. Copper (Cu)
14. Zinc (Zn)

Our Clients

Our company successfully worked with Government Approved Economic Zone Sites governed by BEZA. We are also involved with other private economic zones as well as infrastructure development projects. Our footprint also exists in the industrial sector as well as different government and private organisations to assist them in achieving environmental soundness for their works.

Assuring freedom of action and choice while providing the optimum solutions for each project, BEETLSL maintains a core organizational value. To build customer confidence and ensure strategic and technical assistance, commitment, effort, and accountability are all crucial qualities that cannot be overlooked by us.

Bangladesh Environmental Engineering Training & Lab Services Ltd.

About us:

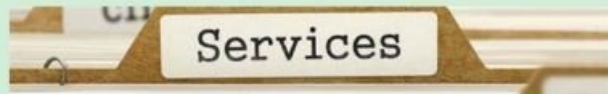

Bangladesh Environmental Engineering Training and Lab Services Limited (BEETLSL) has emerged as one of the top environmental labs and consulting firms in Bangladesh. The organizational structure of BEETLSL has been kept to serve customers and the community by providing professional excellence and innovation. From the beginning, BEETLSL is focusing on sustainable consulting services to make sure that the nature and environment of Bangladesh can remain healthy for future generations. We always follow the national and international environmental standards for monitoring and consultation services and for the lab services we maintain updated methods and equipment to get the best results.

Our mission is to be the leading environmental lab and provide the best environmental Services to clients by ensuring environmental sustainability

BEETLSL is focused on accomplishing an environment-friendly nation by following the government's rules and regulations. Our country is blessed with natural resources and in recent times numerous developing projects are being taken where a proper in-depth environmental analysis is mandatory. BEETLSL is fully determined to secure the environment and at the same time help the developer by offering the best environmental amenities so that Bangladesh can be a role model of green development.

Bangladesh Environmental Engineering Training & Lab Services Ltd. (BEETLSL) offers a wide range of advanced laboratory platforms to meet the most challenging environmental missions which provide essential support to consultants, program managers, regulators, health & safety professionals and research teams.

1. Environmental Testing and Monitoring Services:

- Water Quality Test and Monitoring
-Groundwater, surface water and wastewater.
- Air Quality Test and Monitoring
-Ambient Air Quality
- Ambient Noise Level Test and Monitoring
 - Soil Quality Analysis
- Vibration test and monitoring

Photo: Our team involving with the environmental quality survey on different projects

2. Environmental Consultancy Services

- Initial Environmental Examination (IEE)
- Environmental & Social Impact Assessment (EIA)/ (ESIA)
- Environmental Management Plan (EMP)
- Environmental Management System (EMS)
 - Environmental Health & Safety (EHS) Management
- Hazardous Chemical Management Plan (CMP)
 - Waste Management Plan
- Corrective Environmental Action Plan (CEAP)

3. Training

- HSE management, Waste management, EMS

4. Laboratory facilities

BEETLSL is a well-equipped environmental laboratory with the best facility for examining all kinds of water, noise and air quality Parameters. There is a well-experienced and dedicated lab analyst team who are responsible for performing the following lab test according to the client and project demand. We also help other organizations to establish environmental labs as we are connected with relevant organizations.

A. Water Quality Parameters

1. pH
2. Boron
3. Temperature
4. Zinc
5. Total Dissolved Solids (TDS)
6. Titanium
7. Total Suspended Solids (TSS)
8. Sulphide
9. BOD5
10. Sodium
11. COD
12. Silver
13. DO
14. Potassium
15. EC
16. Phosphate
17. Turbidity
18. Phenolic Compounds
19. Arsenic
20. Odour
21. Total and faecal Coliform
22. Nitrite
23. Oil & Grease
24. Cyanide
25. Total Hardness as CaCO₃
26. Copper
27. Total Alkalinity
28. Chloride
29. Calcium
30. Aluminium
31. Magnesium
32. Zooplankton
33. Sulfate (SO₄)
34. Total Alkalinity
35. Nickel
36. Total Phosphorus
37. Cadmium
38. Total Nitrogen
39. Chromium
40. Chlorine
41. Total Iron (Fe)
